Independent software engineering consultant with 10 years of experience delivering secure backend systems for fintech and enterprise teams. I implement payment integrations, identity and account-security controls, and reliable Java-based services, from technical design to production handoff.

Skills

- **Services:** Backend Modernization, Payment Integrations, Identity Security, API Development
- **Backend & Languages:** Java (8-21), Spring Boot, Spring Security, SQL, C#/.NET
- **Architecture:** Microservices, Distributed Systems, Event-Driven Architecture, API Design
- **Infrastructure:** AWS, Docker, Kubernetes, Kafka, Redis, Payara
- **Data:** PostgreSQL, MySQL, SQL Server, Oracle, MongoDB
- **Delivery:** System Integration, Testing, CI/CD, Documentation, Production Support

Work Experience

Senior Full Stack Engineer (Contract)

Martin Bros / FullStack Labs - Remote
07/2026 to Present

Key Achievements:

- Contributed to restructuring an enterprise ERP from 12 WAR deployments into 4 domain-aligned applications, improving separation of responsibilities.
- Investigated and fixed defects in pricing and reporting workflows across a large, multi-module Java codebase.
- Validated changes using a regression suite of 27,587 tests across 22 modules and collaborated with engineering and product teams.
- **Tools and technologies:** Java 21, Jakarta EE, Payara, Maven, JUnit, SQL, AWS.

Senior Backend Engineer

Ontop - Miami, Florida (Remote)
11/2023 to 2026

Key Achievements:

- Implemented end-to-end KYC and identity-verification workflows, integrating third-party providers into customer onboarding.
- Developed account-security controls, including trusted-device mechanisms and safeguards for password recovery and sensitive transfers.
- Built financial-platform capabilities for Global Accounts and payment integrations, including USDC-related flows and event-driven processing.
- Delivered Payment Request backend workflows, APIs and reliability mechanisms for managing financial requests.
- Reduced a high-traffic reporting process from approximately 100 seconds to under 1 second using caching and algorithmic improvements.
- Designed an independent integration microservice to reduce coupling; contributed AI functionality using Spring AI and MCP.
- **Tools and technologies:** Java 11-21, Spring Boot, Spring Security, PostgreSQL, Kafka, Redis, AWS, Docker, Kubernetes, Flyway, JUnit/Mockito, ELK.

Fullstack Engineer (Backend focus)

Sura - Integra AFP, Lima, Peru
04/2021 to 10/2023

Key Achievements:

- Built identity-verification workflows using AWS Rekognition to compare identity documents and selfies during digital onboarding.
- Implemented session-management protections enforcing a single active session per user account.
- Integrated support automation across WhatsApp, web and Facebook; developed batch processes to reduce manual work.
- **Tools and technologies:** Java, Spring Boot, Spring Security, AWS (Rekognition, S3, IAM), PostgreSQL, Hibernate/JPA, Docker, REST APIs.

Professor

ISIL - Lima, Peru
08/2022 to Present

Overview:
Teach software development, service-oriented architecture, and software design; mentor students in technical practices.

- **Tools and technologies:** Java, Jakarta EE, MySQL, JPA, Hibernate.

Senior IT Analyst

Profuturo AFP - Lima, Peru
06/2018 to 04/2021

Key Achievements:

- Implemented automated risk-scoring and regulatory reports for financial operations.
- Refactored financial applications and database-intensive processes during increased operational demand.
- Automated operational workflows and reduced manual tasks for internal users.
- **Tools and technologies:** Java, Spring Boot, SQL Server, PostgreSQL, .NET, batch processing, ETL.

Associate Consultant

Inetum - Lima, Peru
03/2017 to 05/2018

Key Achievements:

- Developed an online management system for performance metrics as part of the client's first Agile project.
- Automated monthly sales generation, improving operational efficiency.
- **Tools and technologies:** C#, Visual Basic, SQL Server, T-SQL, .NET.

Software Developer

Effitec IT - Lima, Peru
09/2016 to 03/2017

Key Achievements:

- Built APIs and web applications using .NET, Angular, JavaScript, Oracle and Informix.

Education

Universidad Complutense Madrid — Online - Madrid
Master Artificial Intelligence and Deep Learning — 09/2025 to Present

British Columbia Institute of Technology — Vancouver, BC
Software Systems Development Program (Honors) — 09/2024 to 05/2025

San Martin de Porres University — Lima, Peru
Bachelor's degree in Computer Science Engineering — 03/2010 to 06/2017

Certifications

- Azure AI Engineer Associate
- AWS Certified Cloud Practitioner
- Agile Coach Professional Certificate
- Enterprise Digital Transformation
- Team Leadership and Coaching
- Scrum Master Certified
