EDUARDO ZUNIGA

SENIOR BACKEND ENGINEER | JAVA · SPRING BOOT · FINTECH · DISTRIBUTED SYSTEMS

eduzsantillan@gmail.com | English & Spanish | Remote / International

Backend-focused software engineer with 10 years of experience delivering financial and enterprise platforms across the Americas. Specialized in Java/Spring Boot, payments, KYC and account security, distributed services, and production reliability. Experienced owning features from architecture through implementation, testing and rollout.

CORE EXPERTISE

Backend: Java 8–21, Spring Boot, Spring Security, Spring Data JPA, Hibernate, REST APIs, SQL, C#/.NET

Architecture & integration: Microservices, event-driven systems, Kafka, API design, distributed workflows, event sourcing exposure

Data & platforms: PostgreSQL, MySQL, SQL Server, Oracle, MongoDB, Redis; AWS, Docker, Kubernetes, Payara

Engineering practices: JUnit, Mockito, Testcontainers, Flyway, CI/CD, ELK, performance profiling, incident troubleshooting

PROFESSIONAL EXPERIENCE

Senior Full Stack Engineer (Contract) | Martin Bros. / FullStack Labs Jul 2026–Present | Remote

- Contributed to an ERP domain restructuring initiative consolidating 12 deployable WARs into 4 domain-aligned WARs, improving separation of enterprise application responsibilities.
- Investigated and corrected business workflow defects in resident update summaries and price viewing/printing features across a large Java enterprise codebase.
- Validated changes in a multi-module environment, including running a regression suite with 27,000+ tests across 22 modules; collaborated with product and engineering stakeholders on integration behavior.

Senior Backend Engineer | Ontop Nov 2023–2026 | Remote

- Implemented end-to-end KYC workflows and account-protection controls for sensitive financial operations, including trusted-device mechanisms and security checks for transfers and password recovery.
- Built payment-platform capabilities involving Global Accounts, financial integrations and USDC-related flows, working with event-driven designs and event sourcing concepts.
- Owned backend delivery of Payment Request functionality, including domain modeling, APIs and workflows that enable contractors to request funds through the platform.
- Optimized a high-traffic reporting workflow from approximately 100 seconds to under 1 second through caching and algorithmic improvements.
- Designed an independent service to centralize reusable integrations and reduce coupling across internal systems.
- Delivered Spring Boot services in a distributed environment with Kafka, PostgreSQL, Redis, Kubernetes and AWS; investigated production issues and supported engineering peers.

Full Stack Engineer (Backend Focus) | SURA – Integra AFP Apr 2021–Oct 2023 | Lima, Peru

- Implemented digital identity verification using AWS Rekognition to compare identity-document and selfie images as part of customer onboarding and security workflows.
- Built session-security controls to enforce a single active session per account, strengthening account access management.
- Integrated customer-service automation across WhatsApp, web and Facebook and developed batch workflows to reduce manual operational effort.

Senior IT Analyst | Profuturo AFP Jun 2018–Apr 2021 | Lima, Peru

- Developed automated risk-scoring and regulatory reporting workflows for financial operations.
- Refactored financial applications and improved database-intensive processes during periods of increased operational demand; automated manual support tasks.

EARLIER EXPERIENCE & TEACHING

Associate Consultant — Inetum (Mar 2017–May 2018) | Software Developer — Effitec IT (Sep 2016–Mar 2017) | Professor — ISIL (from Aug 2022)

EDUCATION

British Columbia Institute of Technology (BCIT) — Software Systems Development, Honors (2025)

Universidad de San Martín de Porres — Bachelor's Degree, Computer Science Engineering (2017)
